How Compressible Are Your Feet?

Very Compressible       Somewhat Compressible       Not Compressible

*To determine if your feet are compressible, stand barefoot on flat and squeeze the sides of your metatarsals. If the sides are mobile and can be squished in, your feet are most likely compressible. Compressible feet often appear wider when standing flat and narrower when they are on point.*

How many years have you been dancing on pointe? \_\_\_\_\_

### Shank Stiffness

You prefer a traditional paste shoe this is:

Brand New     Slightly Used     Broken In     Wearing Out     Almost Dead

Pads or Cushions \_\_\_\_\_

*Please tell us what type of cushions you currently wear in your pointe shoes and if you want to continue wearing them. Most dancers find they can wear less padding, if any, in their Gaynor Mindens. Keep in mind that padding will impact the fit of your shoes.*
